

I am a very strong supporter of the New Jersey Do Not Call list. I strongly feel that telephone calls should not be made to private residences. We have very busy stressful lives and intrusions from telemarketers during personal time, dinner time, family time and sometimes bedtime interrupts the ability to relax and enjoy life. In addition, many telemarketers are convicts calling from prisons. They have been known to be rude and to have violate privacy information. I have in the past received telephone calls from telemarketers, tried to politely say no and been called some horrible names. I am very happy with the way NJ Do Not Call is working and do not want it interfered with. Thank you.
